

How to Setup ODBC Connections needed for Excel Sheets.

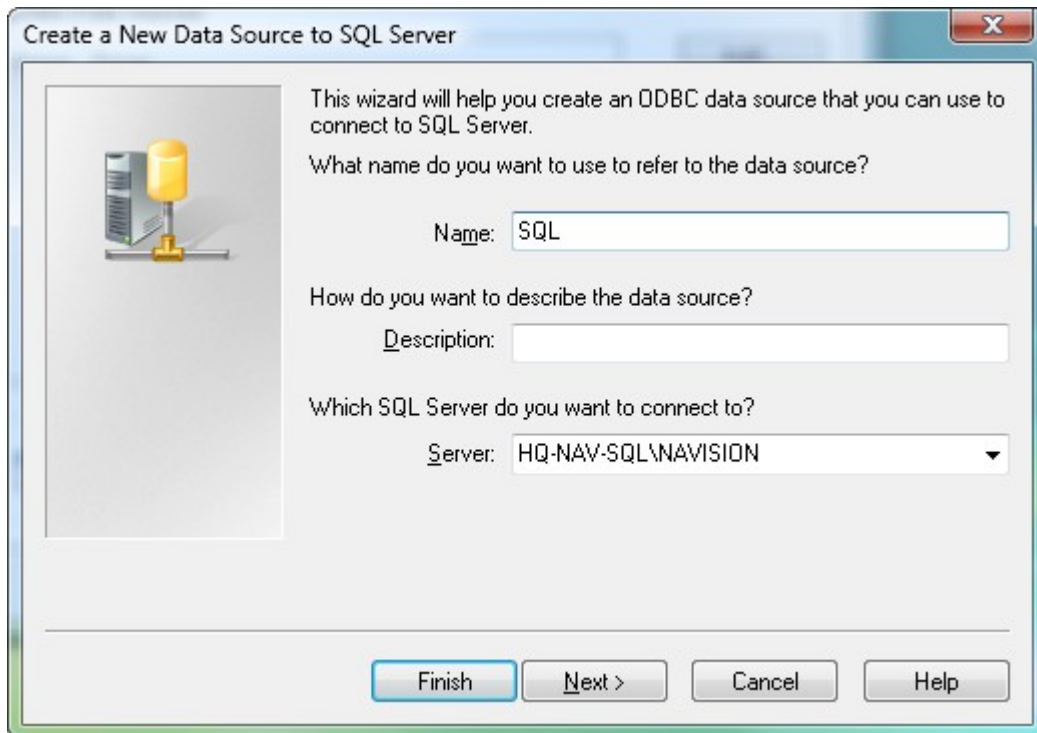

First you need to go to Control Panel → Administrative Tools → ODBC
Go to the tab System DSN.

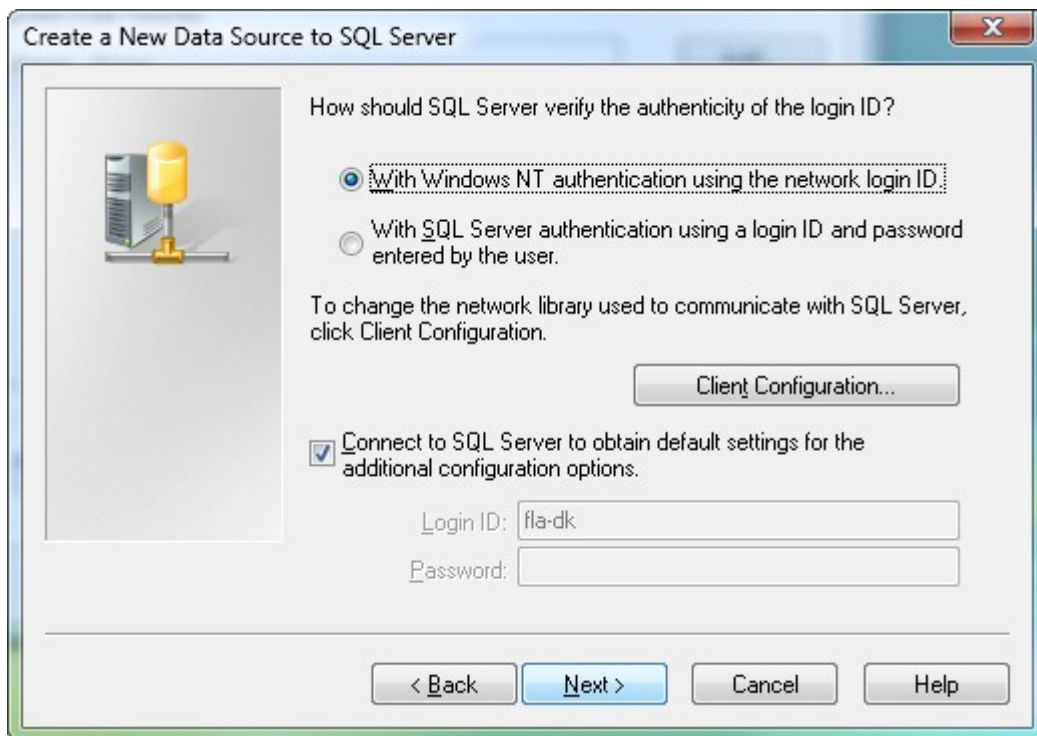

Click on "Add".

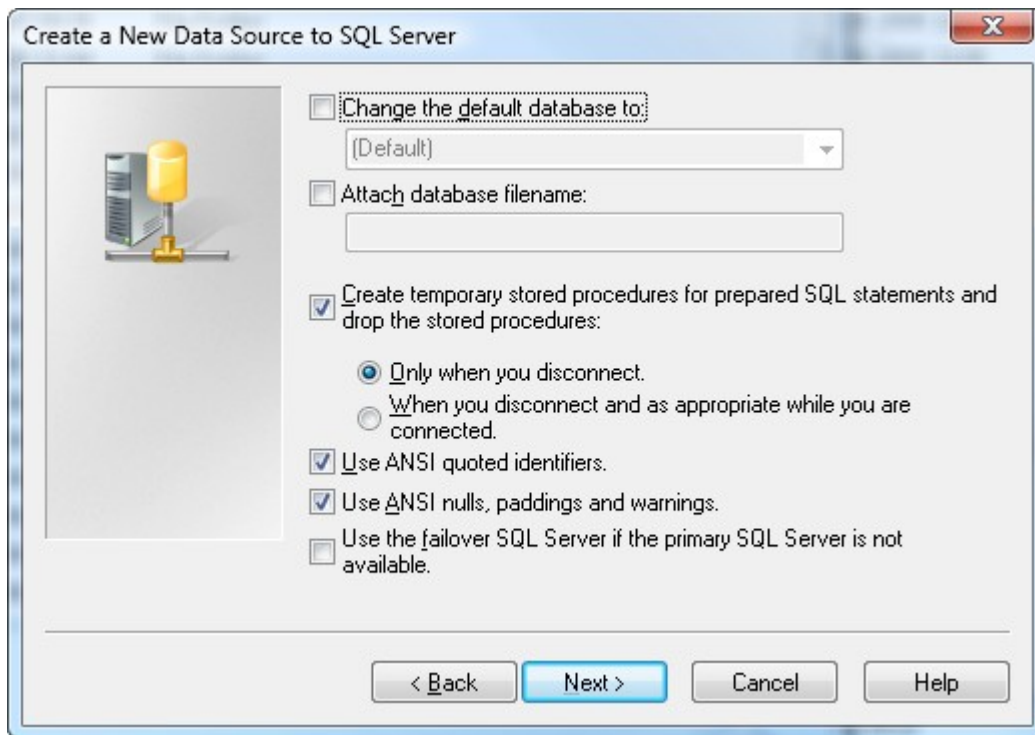

Goto the bottom and select "SQL Server", and click "Finish"

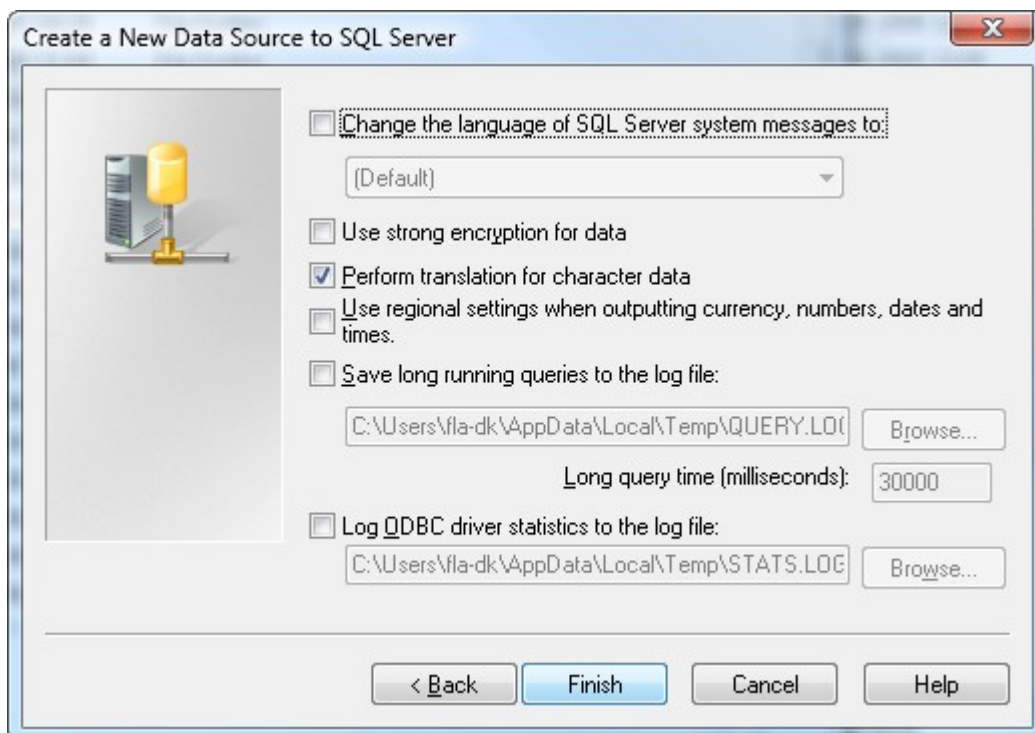

Enter the information as above, and Click "Next".

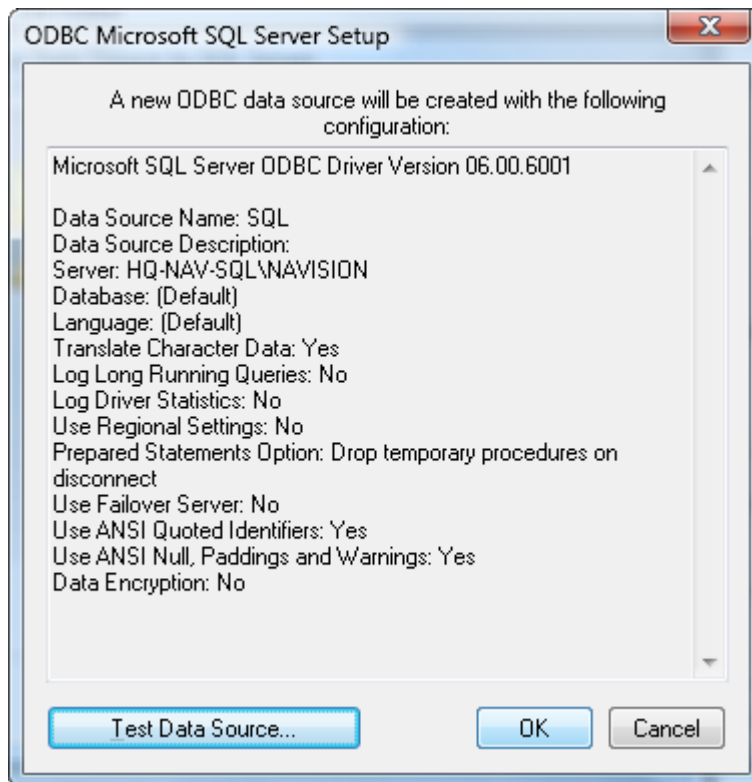

Leave the information as Above and Click "Next".

Again leave it as it is, and click "Next".

Click "Finish"

Click "OK".

You are now back to the ODBC – System DSN Picture.

Click "OK"

You have now setup the first ODBC Connection.

Now you need one more connection.

Repeat the steps,

But use the information below.
